

Canadian Fire Services Are Looking at *Electronic Surveillance Corporation*

For

- Fastest reception of Fire Alarm signals
- A recurring revenue source controlled entirely by your Department

Ask for a Demonstration of our
Direct Access
Fire Services Alarm Monitoring Package

The Model 8100 Receiver is installed in the Communication Room. It displays and prints alarm messages and if required, summons pagers.

The 8240 Transmitter monitors Fire Alarms, Sprinkler Systems, Lift Stations, Reservoirs and other critical processes.

- Emergency Signals Have “Direct Access” to your Communications Centre
- No Minimum Number of Systems Required
- Excellent Track Record in Full Time and Volunteer Departments
- Alarm Handling Software for Site Plans, Contacts, Shutoffs etc.
- System is Owned by your Municipality
- Compatible With Most Computer-Aided Dispatch Systems
